

# END-OF-YEAR **Mathical** Reading Report!

At the end of the school year, make a bar chart to show your reading totals, with your teacher's help! Figure out the largest number of books you read in a month. Keep in mind you'll need to put that number at or near the top of your y-axis (at left) when you label it. You can label the y-axis lines by ones, twos, fives or tens, depending on the number you read. Now draw a vertical bar for each month using the guides on the x-axis!

**MATHICAL BOOKS READ EACH MONTH**
